- Diversified Crypto Exposure.** The Fund provides a single point of access to gain exposure to the largest assets in the crypto market, screened for certain risks, without having to pick individual crypto assets.
- Subscriptions and Redemptions at NAV.** The Fund offers subscriptions and redemptions at its Net Asset Value (NAV) weekly. It will not pursue public market quotation. This eliminates complexities related to minimum holding periods, share transfers, and secondary market share price volatility.

The price of a crypto asset may be impacted by the transactions of a small number of holders of such crypto asset. Crypto assets may decline in popularity, acceptance or use, which may impact their price.

As is the case for its other products, Bitwise may attempt to have shares of this investment product quoted on a secondary market. However there is no guarantee this will be successful. Although the shares of certain Bitwise investment products have been approved for trading on a secondary market, investors in this investment product should not assume that the Shares will ever obtain such an approval due to a variety of factors, including questions regulators such as the SEC, FINRA or other regulatory bodies may have regarding the investment product. Shareholders of this investment product should be prepared to bear the risk of investment in the shares indefinitely.

Diversification may not protect against market risk. Diversification does not ensure a profit or protect against a loss in a declining market.
