

Bitwise Blue-Chip NFT Index Fund

As of June 30, 2026

The Fund's principal investment strategy is to invest in a portfolio of non-fungible tokens (NFTs) that seeks to track the Bitwise Blue-Chip NFT Collections Index, an index of the most valuable and established ("blue-chip") arts and collectibles NFT collections. The Index has a public, formal methodology that includes eligibility rules meant to screen out certain critical risks around custody, liquidity, regulation, and other concerns. The Index is rebalanced semiannually.

Why Invest?

- 1 Access to Blue-Chip NFTs.** Non-Fungible Tokens (NFTs) have emerged as a powerful force in both the crypto and art worlds, with top items selling for millions of dollars. The Fund provides investors with an accessible way to invest in this emerging theme.
- 2 Diversified Exposure.** The Fund seeks to track an index of the largest and most established ("blue-chip") NFT collections, including CryptoPunks, Bored Apes, and more, all with an attractive minimum investment entry point.
- 3 Simple and Easy.** The Fund leverages Bitwise's expertise to remove the complexities related to the purchase and custody of individual NFTs, offering a traditional private placement investment vehicle.

Risks and Important Information

Bitwise Asset Management, Inc. and its affiliates (collectively, "Bitwise") are providing this information to accredited investors for informational purposes only in relation to a potential opportunity to subscribe for shares ("Shares") in the Bitwise Blue-Chip NFT Index Fund (the "Fund"). This is neither an offer to sell nor a solicitation of an offer to buy Shares in any Fund. Any offer to sell or solicitation of an offer to buy Shares will be made solely through the Fund's definitive offering documents, identified as such, in respect of the Fund in compliance with the terms of all applicable securities and other laws. Such definitive offering documents, if any, will describe risks related to an investment in the Fund (including loss of the entire investment) and will qualify in their entirety the information set forth herein. The Shares will be offered and sold under the exemption provided by Section 4(a)(2) of the Securities Act of 1933 and Rule 506 of Regulation D promulgated thereunder and other exemptions of similar import in the laws of the states and jurisdictions where the offering will be made. The offer and sale of Shares have not been registered with or approved or disapproved by the Securities and Exchange Commission (the "SEC") or the securities commission or regulatory authority of any state or foreign jurisdiction, nor is such registration contemplated.

Carefully consider the investment objectives, risk factors and charges and expenses of any Bitwise investment product before investing. Investing involves risk, including the possible loss of principal. There is no guarantee or assurance that the methodology used by Bitwise or any of the Bitwise investment products will result in any Bitwise investment product achieving positive investment returns or outperforming other investment products. **There is no guarantee or assurance that an investor's investment objectives will be met through an investment into any Bitwise investment product, and an investor may lose all or a portion of the investment. Investors into any Bitwise investment product should be willing to accept a high degree of volatility in the price of the investment product and the possibility of significant losses. An investment in any Bitwise investment product involves a substantial degree of risk.** Certain products may be limited to investment by accredited investors only.

For certain Bitwise investment products, Bitwise is the index provider. There is no guarantee or assurance that the methodology used to create the index will result in funds that track that index achieving positive investment returns or outperforming other investment products. Indices are unmanaged and do not include the effect of fees. One cannot invest directly in an index.

Certain of the Bitwise investment products may be subject to the risks associated with investing in crypto assets, including cryptocurrencies and crypto tokens. Because crypto assets are a new technological innovation with a limited history, they are a highly speculative asset. Future regulatory actions or policies may limit the ability to sell, exchange or use a crypto asset. The price of a crypto asset may be impacted by the transactions of a small number of holders of such crypto asset. Crypto assets may decline in popularity, acceptance or use, which may impact their price. Investments in a single asset may cause significant volatility within the fund. NFTs are an extremely new artistic and cultural phenomenon, and interest in such artwork could wane. If the demand for NFT artwork diminishes, the prices of NFT items could be negatively affected. The market for NFTs can be subject to shallow trade volume, extreme hoarding, low liquidity and high bankruptcy risk. NFTs are also subject to risks and challenges associated with intellectual property rights and fraud.

Diversification may not protect against market risk. Diversification does not ensure a profit or protect against a loss in a declining market.

As is the case for its other products, Bitwise may attempt to have shares of this investment product quoted on a secondary market. However there is no guarantee this will be successful. Although the shares of certain Bitwise investment products have been approved for trading on a secondary market, investors in this investment product should not assume that the shares will ever obtain such an approval due to a variety of factors, including questions that regulators such as the SEC, FINRA or other regulatory bodies may have regarding the investment product. Shareholders of this investment product should be prepared to bear the risk of investment in the shares indefinitely.
